

4 mm grid

Brochure grids

For brochures in the standard formats 210 x 297 mm and 100 x 210 mm a fixed 4 mm grid for graphic lines has been designed.

For these formats the three stroke widths are 0.3 pt, 2 pt and 4mm.

The graphic lines are in the company and supporting colours. Make sure that at least one line in 0.3 pt. is Falck red on each spread or front page.

Graphic lines must not dominate or interfere with the communication.
